Summary

Full-stack and AI engineer with 3+ years of client work in Next.js, React, Node.js and Python. Top Rated on Upwork (100% Job Success, 23 five-star reviews). I build SaaS products, real-time dashboards and LLM features, and finish stalled apps.

Experience

Full-Stack Developer Apr 2025 – Present
HThree Group *Malaysia*

- Long-term contract building and maintaining features for the company's web platforms.
- Work across the full stack with React, Node.js and MongoDB: new features, bug fixes and performance.

CTO & Full-Stack Developer Jan 2025 – Present
CrevixMedia *Chattogram, Bangladesh*

- Lead technical delivery of client web projects: architecture, estimates, code review and deployment.

Freelance Full-Stack Developer (Top Rated) Mar 2023 – Present
Upwork and Fiverr *Worldwide*

- **AI Radio Royalty Tracker (2024):** solo build of a SaaS that tracks radio airplay, calculates royalties and sells airtime, with 5 role-based dashboards (Next.js, Node.js, MongoDB).
- **AutoWorx:** built appointment, staff and finance dashboards for an AI-powered CRM for auto shops (Next.js, Prisma).
- Migrated a live Node.js site to Next.js and MongoDB (366 hours); finalized a public Shopify app (Remix, Polaris).
- Shipped a headless Shopify store, a 313-facility FAA data platform with maps and charts, and 10+ business sites.

Projects

NextGen Career | *React, Node.js, MongoDB, Gemini, Stripe* Champion, IIUC Tech Fest 2025

- Led the team and full-stack build: AI job matching, career chatbot, mock interviews and CV builder, in English and Bangla.

TechWrite AI Suite | *Next.js, Express, Gemini, DeepSeek* Own product

- Three AI agents that review, summarize and research technical documents, with model fallback behind one interface.

AgroConnect | *React, Express, MongoDB, Socket.io* 1st Runner Up, Tech Hackathon 2025

- Farmer-to-buyer marketplace with live order updates, seller dashboards and bKash payment checks.
